Williams & Burrows, Inc.
Contractor

Adjustable in any direction on surface of the wall. Patented design permits use of pre-set anchor bolts.

Concealed anchorage – Clean modern, shell moulded lines. No unsightly exposed nuts, bolts or screws.

Speeds painting time. Mounting plate may be installed on unfinished wall. Brackets and rails installed AFTER finished painting, eliminates cleaning problem.

Locking feature cinches bracket flange to wall—even if anchor bolt is loose.

Economical. Competitively priced. Ariston adjustable brackets are quickly installed by unskilled labor.

Special brackets with our adjustable and concealed mounting features can be furnished providing minimum flange dimensions of 3½" by ⅝" are maintained.

Available Finishes

US27 – Aluminum Satin Finished and Lacquered
US28 – Aluminum Satin Finished and Alumilited * or Anodized
US9 – Bronze Satin Finished
US26D – Chrome Plated Bronze
Special finishes obtainable to order.

*Aluminum brackets may be alumilited to match alumilited extrusions.

Immediate delivery of standard designs

Specifications

Furnish Ariston Aluminum or Bronze Hand rail Bracket No. 500 with U.S. No. . . . . finish (specify preference) and concealed anchorage to wall. No exposed bolts, nuts or screws will be permitted.

Shell-moulded brackets to be cast from Aluminum Alloy F214 or Bronze and shall be furnished with concealed wall fittings consisting of an anchor bolt, wall mounting plate and steel adjustment disc permitting at least 1" wall adjustment on face of wall. Assembly shall be locked with a stainless steel socket type set screw.

Anchor bolts and rail screws to be supplied by rail fabricator.

We reserve the right to modify material and design without notice in the interest of improving product.

Products shown in this catalogue fully protected by U.S. patents.
